QUESTION 1:
We're coming up on the 10-year anniversary of the Emergency Economic Stabilization Act of 2008, which created the Troubled Asset Relief Program (or TARP). These programs were designed to rescue banks during the financial crisis. Some may refer to them as the bank bailouts.

Looking back, do you think these bank rescues or bailouts were harmful or helpful for the country?

QUESTION 7:
Besides the rescue of banks, or the bank bailouts, there were bailouts and involvement in other industries as well during the financial crisis.
For example, Chrysler received guaranteed loans from the federal government and was forced to restructure the company's debt. Some may refer to this as a bailout of Chrysler.
Looking back, do you think this was helpful or harmful for the country?

QUESTION 8:

During and after the financial crisis there was much said about ending 'too big to fail.' This was the idea that... 1) a banking institution could be so big that the government is essentially forced to rescue it in a crisis to prevent a cascading collapse of the whole financial system, and... 2) banks got big specifically because they expected to be bailed out. Do you think "too big to fail" is or is not still a problem?

QUESTION 12:

Some people have argued that previous bailouts in the 70s, 80s, and 90s set an expectation at many large companies that they would be bailed out as well if anything went seriously wrong, which led to the bailouts of 2008. Do you think companies take advantage of this expectation, or do you think companies do not take advantage of this expectation?
